

## DECLARATION OF COMMON INTERESTS

We, the undersigned, declare here, at the Riga Summit on the Multilingual Digital Single Market, encouraged by the letter Vice President Andrus Ansip sent to its participants, that we stand united in our goal and interest to:

- support multilingualism in Europe by employing language technology in business, society and governance, to create a truly Multilingual Digital Single Market,
- exchange and share information in our efforts to promote our goals and interests at local, national and European levels,
- raise awareness in society at large using channels available to our associations, alliances and societies.

In the near future, we foresee the establishment of a Memorandum of Understanding among our organisations towards a “Coalition for a Multilingual Europe”, to better serve our members address the language barrier challenges towards establishing a truly integrated Multilingual Digital Single Market.
